Work History

Tenshnova(*Co-founder*), Cameroon
May 2019 - Present

Project Manager and Software Engineer

- Collaborate effectively and consistently with project sponsors, key stakeholders, and team to enlist project support and facilitate the completion of work.
- Cultivate talent, act as coach/mentor, generate momentum while keeping the team focused on deliverables and manage overall project strategy.
- Work with customers to define requirements for product features, data services and solution architecture.
- Developed responsive websites for clients with ecommerce businesses leading to an increase in their sales.
- Collaborated with my team to develop an e-commerce website in 2 weeks, enabling the sale of 90% of the fabric produced during the CSW Artisanal Fair
- Analyzed user needs and software requirements of client projects to determine the feasibility of design, ensuring project completion at least 2 weeks to the due date.
- Contributed to the analysis, design documentation, implementation and testing of a hybrid mobile application used to manage customers and sales.

Paness Conseil, Cameroon
Dec 2017 - May 2019

Software Developer and Team Lead

- Participated in sales presentation projects due to my ability to translate user needs into usable software solutions assisting the sales team in closing 4 deals generating over $120k in revenue.
- Promoted to lead software engineer and team lead due to earning the highest customer satisfaction rate for the software solutions delivered.
- Assisted in documenting all software systems and applications used by the company, effectively training team members and reducing onboarding time by 50%.

- Led a team of over 8 developers in developing an event planning system, taking it from 10% to 85% completion within 3 months less than 60% of the expected time (MEAN STACK).

IT-Kamer, Cameroon   Sep 2015 - Dec 2017
Intern, Junior SW Eng, SW Eng
- Worked with senior engineering teams, assisting with the development of over 9+ software solutions on a wide variety of platforms including mobile, web, and desktop (Java, JS, Bootstrap, and others).
- Contributed to the requirement gathering, analysis, design and testing phase of an ERP SW which reduced the development time by senior developers to 1 month prior to the delivery date.
- Promoted to SW Eng. 11 months ahead of schedule due to strong performance and organizational impact.

Some Volunteer Work

Anitab.org, Cameroon/Special Projects   Sep 2019 - Present
Cameroon Community Lead/Secretary to mentorship committee/Reviewer/Ambassador
- Started the Cameroon community from scratch and built it to over 58 members, and still growing, with over 3 members winning the Abie award 2022.

Leaders For Techy Tomorrow, Cameroon   Sep 2015 - Dec 2018
Founder/President
- An initiative I started in the university, bringing together female engineers from other universities to inspire and support each other through peer mentorship and seminars. With over 30 devoted members and great academic improvements. Two of them own their own start-ups today.
